Hard Skills

- JavaScript
- Next.js
- React
- Tailwind css
- HTML
- CSS (+SASS)
- Git
- Webpack/Parcel/Vite

Languages

English (B2)

Russian (native)

About me

Hello! My name is Alex, I'm 20 years old and I am frontend developer. I can build adaptive css layouts (+ with Tailwind/SASS), write semantic and accesible HTML, create web applications with Javascript, React, Next.js. I also design UX/UI.

Previously as a sound engineer I worked with clients, so I'm very stress-resistant and sociable. I am a fast learner and I love challenges.

Experience

• ReelRate (pet)

Single page Next.js application with Redux. Features - search for movies from MovieDatabase API, see popular movies, rate, manage/delete rates.

[Website](#) [More info on GitHub](#)

• Kharlam.space (pet)

My personal website made with Next.js and TailWind. Theme functionality and animations made with TailWind CSS.

[Website](#) [More info on GitHub](#)

• Arteo (pet)

Landing of fictional company, made only with JavaScript, HTML, CSS. Has UI elements like slider, dropdown menu, popup window, controlled by JS.
